

Compliance Management & Risk Tracker[®]

Everything you need to manage, track and report key safety & compliance requirements

A safe and healthy workplace not only protects workers from injury and illness, but it can also lower injury and illness costs. A safe environment reduces absenteeism and turnover, increases productivity and quality, and raises morale.

In other words, safety is good for business.

With our online safety **Compliance Management & Risk Tracker[®] (CMRT)** you can manage, track and report key safety and compliance tasks. These tasks include employee training, audits, inspections, corrective actions, and other corporate risk and compliance reporting needs, across one or many facilities anywhere. Our online system allows you to do training individually so as to avoid shutting down operations for hours, thus increasing productivity.

A secure, web-based safety management program

- Manages safety and compliance simply and easily from a single dashboard.
- Helps implement a uniform safety compliance program among multiple facilities.
- Supports required and preferred worker safety training.
- Documents all required safety tasks and training.
- Decreases administrative time to track and review safety and regulatory requirements.
- Available 24 hours a day, 7 days a week.

Reduce the potential for injuries, regulatory fines, and lawsuits, which can result in a financial burden.

Why a Cloud-Based Safety System?

- Helps meet OSHA and other compliance requirements.
- Training and task tracking made easy and affordable.
- Lowers the risk of injuries, penalties and operating costs.

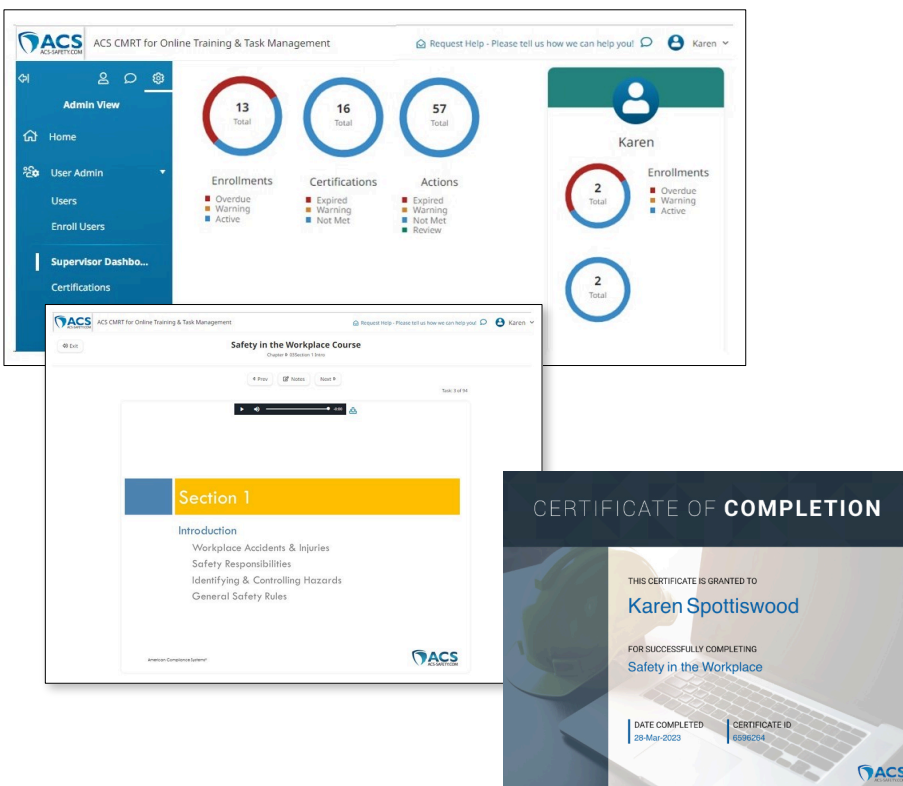

Customized Compliance Communicator

- Online, recorded and instructor-led training
- Task management
- SCORM, AICC and xAPI support
- Integrated course builder
- Powerful administration
- Management dashboards
- Robust enrollment management
- Secure system and ongoing support

A Unique Learning and Tracking System

- Track required training by employee, job function or location.
- Assign and track recurring compliance tasks such as audits or reviews.
- Access on any type of device, anywhere there's an internet connection. Control that access by job type or level.
- Share written plans and policies, procedures, training materials, or other corporate wide forms and documents in a corporate "Knowledge Base", along with any required documentation.
- Use your dashboard to get an overview of compliance training and tasks. You can drill-down to specific due or overdue items, filtered by specific employee or location.
- Offers over 60+ training topics, with many available in Spanish.
- Easy to add new employees, add or change training requirements and maintain historical records.
- Admins will be able to print training reports and compliance documentation in real time.

ACS has **Workplace Safety and Compliance Solutions** that meet your business needs. Whether you require consultative service or a full complement of resources, ACS is dedicated to providing affordable solutions that help you navigate the nuances of workplace safety compliance. Start building your safe workplace today.

"We have utilized ACS for its safety training program for the past several years. ACS has a wide range of services which goes well beyond just the OSHA mandated courses. Being a multilingual company, they offer courses in English and Spanish.

We are also a two-shift operation and they have been very flexible in scheduling courses that need to be on site to accommodate the second shift schedule. We have found ACS to be very knowledgeable and very responsive to any and all of the issues that come up during the normal course of business."

– Rob Paglieri, Director of Finance,
Winpak Control Group

"ACS and their Safety Compliance team get it right the first time. Sam, our ACS Safety Advisor is a great communicator and is always available to speak. ACS takes care of my problems immediately. Using ACS allows me to focus on my job knowing my business is compliant.

I will never go anywhere else."

– Tom Carretta, Manager,
County Line Auto Body

"Through the use of ACS' Safety Pays program, we were able to have our safety committee certified by the State and qualify for a 5% discount on our workers' compensation policy. This discount alone almost pays for the ACS consulting fee for our entire safety program.

The Safety Committee meets monthly to keep safety in the forefront of everyone's mind. We feel that the Safety Pays program is a valuable service that ACS offers to its clients."

– Jim Kolea, Owner/President,
PennFleet Corp.

"We have been very happy with the services that ACS has provided for 20 plus years and have no reason to look elsewhere for our safety concerns. I personally strongly recommend them to any company."

– Ron Gnegy, General Manager,
Rigidply Rafters Inc. of MD
