Financial Benefits of ACS Compliance Management System (CMS) and Compliance Management Risk Tracker (CMRT) Programs

Managing Safety and Compliance Internally: Some Companies are large enough to afford a full-time Safety Manager and Administrative support recognizing the return on investment of lower injuries / accidents, Workers Comp insurance, and proven positive effects on productivity. ***These companies may spend $130k or more per year*** in Salaries and benefits allocated to those efforts. Other companies assign Safety / Compliance duties to Operational Managers and Administrative personnel. ***Do these personnel have adequate time and expertise to assure to minimize exposure and maximize your productivity?*** Can outsourcing the expertise you need provide a better return on investment, and the "peace of mind" that you are both compliant and minimizing risk exposure?

ACS offers a comprehensive compliance program, called the **Compliance Management System (CMS)**, which is designed to help business owners who can't justify the expense of a full-time safety person but need help with recordkeeping, training and other OSHA requirements. By taking a proactive approach with our **CMS Safety Program**, companies have reported saving money by reducing lost workdays and avoiding OSHA fines, lowering their Workers Comp Insurance rates by 20-30% over time. ***This often equates in savings in Workers Comp of ~ 2% or more on your total labor costs.*** What's more, many expert studies have shown that uninsured costs, related productivity losses, can increase the bottom line by up to 4 times that savings.

The ACS Safety Compliance Management Risk Tracker©
Alerts you to key Safety required actions, items need to take. Monitors & reports and keeps the company compliant with OSHA requirements, both required employee training and tasks. This powerful but friendly system is your full-time administration. Secure web-based application, easy "dashboard" overview of your compliance efforts. Easy drill down to details.

Do the Math!

Internally Managed Effort: (annual)	$	ACS CMS + CMRT:	$
- 15-20% of Manager's time + Admin	$20,000	One-Time Set-up	$4,300
- 20% + Reduction in Worker Comp Costs	$30,000	CMS + CMRT Annual Fees	$10,500
- Low est. 2 times WC Savings in other Costs	$60,000		
Cost over 3 years (est.)	**$330,000**	**Cost over 3 years**	**$35,800**
Typical for 100 employees, varies by size & industry
