

OSHA

10/30 Hr Construction

ACS offers OSHA 10 & 30 Hour Construction Courses to meet the new Training Requirements for contractors who perform work in Philadelphia.

These courses are part of the OSHA Outreach Training Program and are designed to increase employee awareness of the hazards and risks common to the construction industry.

Emphasis is placed on the Focus Four construction hazards, including: falls, electrocution, caught-in or -between, and struck-by hazards. Construction health hazards and personal protective equipment are covered as well. Training is based on various topics in OSHA's 1926 Construction Industry Regulations.

The 10 Hour class is intended for entry level workers as an orientation and covers safety and health hazards workers may face on construction work sites, while the 30 Hour class is more appropriate for supervisors or workers with some safety responsibilities.

Course completion of the 10 Hour or 30 Hour construction safety training satisfies the requirements for the Philadelphia Contractor Licensing. Participants who successfully complete the course will receive a DOL/OSHA course completion card (please allow 6-8 weeks for delivery).

Send completed Registration Form to clientservices@acs-safety.com or fax to 610-755-0738.
